

Lubricant Mixing and Delivering System

TYPE:NC55-L-DP10

Outlines

This system is for the mixing and delivering die lubricant.

It sucks-up the die lubricant with L-pump, and supplies to the container the number of counter.

After that, it supplies the water (6000cc), and mixes. Finally, this dilution water is moved to the container for delivering, and delivers to spray unit with diaphragm pump.

Specification

Ratio Range	50 times~160 times
Delivering Range for Die Lubricant	15cc~150cc
Water Quantity	Over 6000cc/min
Delivering Range for Dilution Water	15liter/min/0.5Mpa
Pressure for delivering	0.2Mpa~0.65Mpa
Alarm for Die Lubricant	Alarm if reduce the remaining
Connection Orifice for Water Inlet	Over 15A(1/2)
Connection Orifice for Air Inlet	Over 8A(1/4)
Pressure Range for Air	0.2Mpa~0.7Mpa
Connection Orifice for Dilution Water Outlet	15A(1/2)
Voltage	AC100V

Delivering Time

40 days
